The scientific papers in this book provide a paradigm on the relationship between different branches of science, the relationship between religion and science, or between religion and education. The current publishing volume only invites to a presentation of the importance of these links among different scientific or artistic branches, the argumentation of each participant regarding his position in his own field, a greater deepening of the connection between different scientific fields, the trans disciplinary approach of some themes or theories that may seem scientific but are also part of a type of art (such as, for example, the work of a theologian, or philosopher or thinker).
